

As part of World Earth Day, Dunoon Grammar School's Junior Eco Club decided to raise money for the charity POSSIBLE which enables people to take practical action on climate change. Founded in 2009 and previously known as 10:10 Climate Action, POSSIBLE supports a range of projects focused on carbon reduction and renewable energy.

Junior Eco club members chose to make ethical baked goods using Fair Trade ingredients and invented a new biscuit which they have called "Earth Biscuits". They sold them, without the need for any plastic packaging or single use plastics, to pupils and staff in the school forum at lunch and break time. Thanks to the school community's generosity, they raised £52.00. This donation will be doubled as it was made between 17-25th April.
